

Matthew is a lawyer and consultant focusing on extractive sector law and policy, with a specific emphasis on mining and petroleum taxation regimes. Before starting Mining Policy Group, Matthew headed the legal and economics team at the Natural Resource Governance Institute (NRGI) in New York, a leading policy institute focused on the unique challenges commonly faced by resource rich developing countries. He has a strong and varied background in tax law and policy, having served previously as international tax counsel to the U.S. Senate Committee on Finance and worked as an attorney in a top Washington D.C. law firm specializing in transactional tax planning and

structured finance. Since starting Mining Policy Group, Matthew has worked with a number of government committees and renegotiation teams, advising on legislative and policy reforms, several mining contract negotiations, and the design and implementation of a major mineral rights tender. He has also worked with international NGOs, research institutes and development agencies on a variety of research and training projects.

At NRGI, Matthew oversaw the legal and economic research program and NRGI's offer of advisory services to the governments of resource rich states. He worked with government officials in Africa, Latin America and Asia on the development of mineral laws and policies and supported three African countries' comprehensive mining policy and contract review processes, directly advising government negotiating teams through the negotiation and drafting of several major mining agreements. He also designed and led training activities for parliamentarians and civil society in numerous resource dependent countries.

Matthew previously worked as a consultant at the International Energy Agency in Paris, where he conducted research on the intersection of international trade law and climate change policies. Matthew has a J.D. from Stanford Law School and a Masters degree in international relations and international economics from the Johns Hopkins University, SAIS.
